Yayasan Khazanah Watan Scholar

Computer Science graduate (3.95 CGPA, Dean's List every semester) with hands-on experience building automated data pipelines and applied AI systems at industrial scale.

EDUCATION

2023 – 2026	Bachelor of Computer Science (Software Engineering), Honours <i>Universiti Tenaga Nasional, Putrajaya — Cumulative Grade Point Average: 3.95 / 4.00, Dean's List every semester</i>
2022 – 2023	Foundation in Computer Science, Honours <i>Universiti Tenaga Nasional, Putrajaya — Cumulative Grade Point Average: 4.00 / 4.00, Dean's List every semester</i>

WORK EXPERIENCE

June 2026 – August 2026	Digital E-Commerce Intern, Guardian Malaysia (Health & Beauty Retail) • Built an automated system checking 965,130 customer search results against an 11,907-product catalog — no manual checking needed. • Sorted 680,000 search terms (82% of all cases) into 5 categories automatically, catching spelling mistakes with 95–100% accuracy. • Reviewed 700,000 records to fix tracking errors and brand mismatches across 742 brands on the company's online store platform (Magento).
-------------------------	---

PROJECTS

EmoShield — AI-Based Emotion Monitoring App for Child Well-Being (Final Year Project)

- Built a mobile app (Flutter, Firebase, TensorFlow Lite, OpenCV) giving parents real-time emotion detection and automated reports.
- Ran the AI directly on the phone instead of the cloud to protect privacy and cut delay; used an AI language model to turn results into parent guidance.

REMinder — Sleep & Habit Tracking Mobile App

- Built a 10-screen mobile app (.NET MAUI, C#, Firebase) to track sleep quality and daily habits.
- Combined offline storage (SQLite) with cloud sync (Firebase) so data stays available across devices; automated sleep-time calculations to remove manual entry.

SimpleStore — Product & Supplier Management System

- Built a web system (Laravel, MySQL) to manage products and suppliers, with an organized database structure and enforced data relationships.

Airport Luggage Management System

- Built a C++ program to sort, track, and retrieve airport baggage using core data structures across 6 program modules.
- Modeled aircraft-unloading order and used sorting/searching methods to speed up baggage retrieval.

LEADERSHIP EXPERIENCE

October 2024 – 2025

Director, UNITEN Career Ambassador Program

- Organized UNITEN Career Fair 2025 — 23 companies, 10 talks, 2 days.
 - Led planning with industry partners including MTC Engineering, Leader Energy, SLB, Caceis, Zeneration Energy, LTAT, Strateq, YTL, and MFPC.
 - Coordinated between university staff, student teams, and company partners to arrange company site visits.
-

October 2024 – 2025

Head of Public Relations, UNITEN Programming Club (Pro-C)

- Promoted technical talks, webinars, and seminars to students.
 - Helped organize UNITEN Hackathon 2023 and a cybersecurity Capture-the-Flag competition (Rentas CTF).
-

TECHNICAL SKILLS

- Programming Languages: Python, PHP, JavaScript, Dart, C++, Java, SQL/MySQL, C#, HTML/CSS
 - Frameworks & Libraries: Laravel, Flutter, Bootstrap, jQuery, Alpine.js, .NET MAUI, FastAPI
 - Tools & Software: Figma, GitHub, Visual Studio Code, Visual Studio 2022, Android Studio, Puppeteer, Node.js
 - Databases & Cloud Services: MySQL, SQLite, Firebase Realtime Database, Cloud Firestore, Firebase Authentication, Firebase Storage
 - AI & Machine Learning: TensorFlow, TensorFlow Lite, MediaPipe, OpenCV, Computer Vision
 - Data Visualisation: Tableau, Power BI
-

LANGUAGES

English — Fluent | Mandarin Chinese — Fluent

SOFT SKILLS

Detail Awareness • Fast Learning Ability • Reliable Team Collaboration • Clear Communication • Adaptability
